

The Only Compact Transmitter Designed & Built For Fitness

Versatility best describes this system. Built onto Aeromic, Cyclemic, or E-mic - to be worn as a headworn, armband, or waistband transmitter. The specially designed O'ring seals, corrosion inhibiting laquered circuit board, and sealed push button 'on/off' switch set this transmitter in a class by itself for fitness use. Choice of two 8 channel transmitters matching with a 16 Channel UHF Receiver give you the flexibility to operate in the difficult wireless areas. Check out these features:

- * Your choice of headset for system - Aeromic, Cyclemic, or E-mic
- * Your choice of antenna wire length for: Headframe mounting, Armband Pouch, or Waist worn pouchbelt
- * 1 x 8 channel frequency agile UHF Mini Transmitter supplied
- * Coated circuit boards - to protect against sweat damage
- * Sealed single push button 'ON/OFF' switch on the transmitter
- * Single AAA battery operation gives 5 hours airtime (Alkaline)
- * Tone coded transmission - eliminates 'on/off' pop noises and need for 'mute' switch found on cheaper single channel transmitters.
- * Software locked channel number display on Receiver
- * Rack mount kit and front mounting antenna wiring kit included
- * 2 Frequency groups to choose from with 4 channels in each working together without interference in each region.
