

AG-800 is a light weight, portable, convenient, and highly functional smoke disinfector.

AG-800 can spread disinfecting fog to fill a space in all directions. It completes reheating within 90 seconds, and generates 3,000 cu.ft. of fog output per minute.

Operation is easy. Simply turn on the power and press the bottom on handlebar. Operating with FLD sanitation solution, it can lay a thin layer on the surface of objects in the room to inhibit bacteria growth.

This can be used as a regular maintenance solution in any venue, including cars, houses, offices, theatres, department stores and retail, station plaza, airports, gyms or hospitals! It can kill most fungi, germs, virus, dust mites and also gets rid of bad odors effectively.

You are, of course, still recommended to wash your hands diligently and follow the WHO guidelines for preventing the virus spread and contamination, but periodically sanitizing spaces you use to kill germs, virus etc. is an additional layer of protection.

Features

FLD-05 Sanitation Solution

500 ml per bottle

Function : Kill fungi, germs, virus / e.g. flu virus, dust mites, bad odors

Ingredients/Manufacture date :

See package.

Shelf life: 5 years.

Storage : Keep in cool, dry place and avoid direct sunlight. Keep out of children's reach. Use within 6 months once opened, cap tightly after use.

Specification

Input Voltage	AC 220-240V, 50/60Hz 3.5A
Rated Power	800W
Warm-up Time	2 minutes (approx.)
Fluid Consumption	10 ml / min
Output	3,000 cu.ft. / per min
Fluid Tank Capacity	0.8 L
Compatible fluid	Air Guard FLD-05
Ambient temp. range	0°C - 40°C
Control	Manual, Wireless
Dimension	L 315 W128 H218 mm
Weight	3.8 KG
