CCSD-TCD

Transport case for 10x CCSD-D

BOSCH
Invented for life

Introduction Announcement

► **Expected availability date**
July 2017

Product Description

The CCSD-TCD Transport case is used when the CCS 1000 D system is not used in one fixed location and therefore has to be easily transported and stored. This is often the case in town halls, hotels, business centers, local government offices, or smaller halls in major conference venues.
The Transport case can store up to ten Discussion Devices (any combination of CCSD-DS or CCSD-DL devices is possible). The shaped foam interior provides ample protection for the Discussion Devices. It also enables easy packing and unpacking.

Features / benefits

* Stores up to ten Discussion Devices (with short and long stem microphones) with cables
* Attractive, sturdy construction
* Specially shaped interior to securely hold Discussion Devices
* Easy to transport and store, due to wheels and handles
* Two separate locks for optimum security
